TALEN-X ANNOUNCES WAVEFRONT SIMULATOR

BroadSim, powered by Skydel SDX, has brought new innovations to the forefront each year to meet the growing needs of Talen-X's customers. In 2019, Talen-X is proud to officially announce the newest addition to its software-defined platform: BroadSim Wavefront.

BroadSim Wavefront further extends the capabilities achieved by BroadSim Anechoic, to incorporate support for **CRPA and multi-element receiver testing**.

Features include:

- Phase-coherent simulation
- Real-time automated phase calibration
- Scalable from 4 to 16 elements
- Advanced jamming and spoofing scenarios

Talen-X engineers are approaching delivery of an operational demo unit, to be unveiled to industry professionals very soon...
